

FTS-4G and FTS-WIFI BULLET FARM CAMERAS

FTS-4G and FTS-WIFI BULLET Farm Cameras

Developed for Australia's demanding Australian rural and industrial environments, the **FTS-4G and FTS-WIFI BULLET Farm Cameras** provide farm and rural property owners with robust, High Definition, high quality commercial standalone security cameras. With over 4500 cameras installed across all states and regions of Australia since 2019, they are a proven farm and rural security solution.

Available in both Telstra 4G SIM card and Wifi versions, they have a range of features ...

- **Telstra 4G model** - connects to Telstra cellular network via data SIM card.
WIFI model connects to your own onsite internet wifi or Starlink connection.
- **MOTION EVENT RECORDING** - uses on-board firmware VMS Detection to trigger motion event recording - capturing all activity. Sensitivity and target area selection all programmable. Many standalone cameras use PIR - movement detection - to trigger event recording. This is not always suited to a farm or rural environment where the camera can be a long way from the target, and where there will be lots of false alarms from birds, light changes etc.
- **ONBOARD RECORDING** - extended time back up recording on SD card.
- **REMOTE APP ACCESS** - remotely view LIVE, RECORDED and DOWNLOAD footage 24/7 - live video stream on phones and mobile devices.
- **NIGHT VISION** - high intensity colour night vision. See and record in total darkness.
- **ALARM NOTIFICATIONS** - be notified in real time via your phone app when activity occurs.
- **TRIGGER ALARM** - security function - can sound onboard alarm siren when activity is detected.
- **IP65 WEATHERPROOF** - long life protection in harsh rural environments.

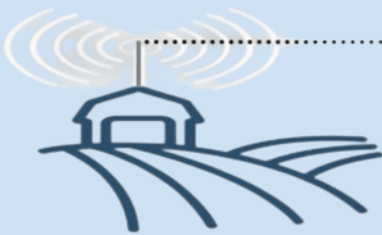

Farm Link Wireless® ... cost effective Wifi and Internet connectivity for farms.

Do you need Wifi and internet access at your sheds, workshops or workers quarters ... or even at other properties many kilometres away from your main farm? Reliable wifi allows you to provide internet access to staff and contractors, install security cameras and monitoring systems, and make phone calls in areas with poor or no phone reception through WiFi Calling.

Traditionally the cost of installing the hardware required is very complicated and expensive, and requires onsite installation by qualified IT technicians - a service very hard to get in most rural areas.

Farm Link® by Farm Tech Solutions is a wireless Enterprise Class quality solution - scalable to whatever size you require - at a very reasonable cost. Designed to be plug and play, **Farm Link®** can be easily installed by unqualified and non-IT people. It is completely plug-and-play ... no IT or networking
